

Instant Messaging

Scattered communication channels make alignment and oversight difficult. Bridge the corporate-frontline divide with enterprise-grade chat and video calling available to every employee.

Bring deskless workers into the fold

Ensure critical updates reach everyone, whether in the office or on the frontline. Deliver real-time communications directly through your intranet, keeping teams informed and engaged.

Empower teams with seamless collaboration

Make it easy for team leads and employees to connect, share updates and coordinate work. Secure, enterprise-grade chat and video calling foster real-time teamwork across any location.

Maintain a healthy communication culture

Ensure workplace conversations are professional, compliant and secure with built-in moderation and oversight. Prevent misinformation and misconduct while fostering a positive, connected culture.

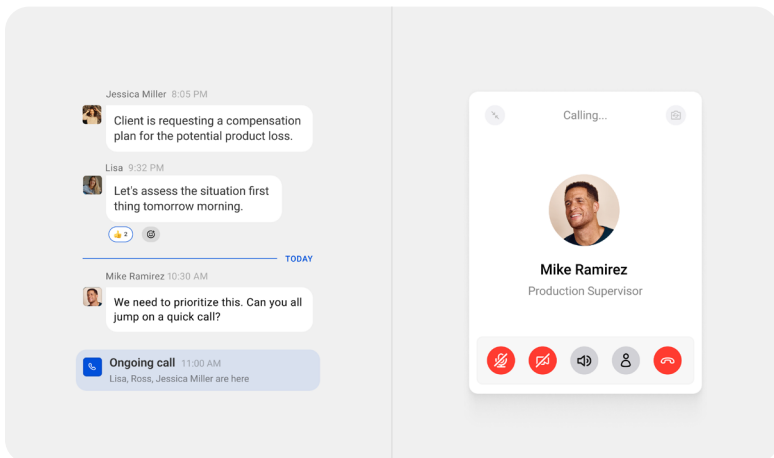

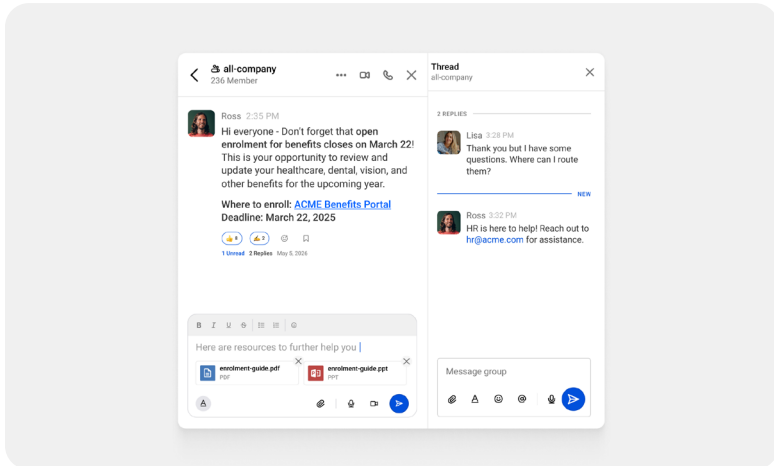

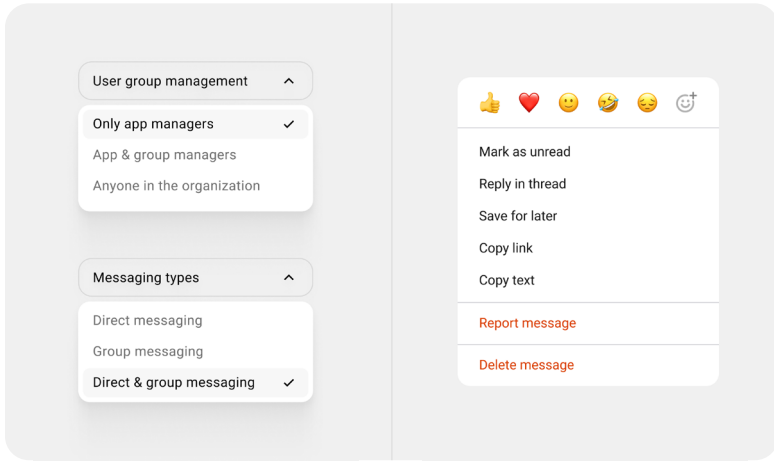

Simplify your communications tech stack

Replace costly, fragmented messaging tools with a built-in, IT-approved solution. Eliminate security risks from unapproved apps while simplifying communication across the organization.

An intuitive experience with robust controls

Seamless intranet integration

Deployed natively within Simpplr, requiring no extra IT effort. Available to anyone with intranet access – no separate logins or standalone apps.

Powerful admin controls

Supports both announcement-only and two-way communication in public or private groups, with customizable permissions for group creation, file-sharing and more – ensuring the right people have the right level of access.

Comprehensive moderation

Includes message flagging, profanity filters and admin actions (ignore, edit, remove) to enforce policies and maintain a professional communication space.

Enterprise-grade security and compliance

Protects conversations with end-to-end encryption and built-in file scanning to prevent malware and harmful attachments – keeping messaging secure and compliant.

Simple, user-friendly experience

Features an intuitive interface designed for effortless adoption, with customizable notification settings to keep employees informed without message overload.

Rich, interactive messaging

Supports @mentions, reactions, GIFs, group chats, and save-for-later features – creating an engaging communication experience without disrupting workflow.

Instant calling (premium add-on)

Allows seamless transitions from messaging to voice or video calls – all within Simpplr – to support richer discussions and faster decision-making.

About Simpplr

Simpplr simplifies and unifies employee communication, engagement, and enablement. It combines a single-platform approach with AI to deliver personalized, frictionless digital experiences, enabling employees to perform their best work from anywhere. As a result, employees are happier, more productive, and more successful. Learn more at simpplr.com.
