

Enterprise Search

Turn information into action—effortlessly with AI-powered Enterprise Search

Redefine how employees find and act on information—all within a platform they trust. Say goodbye to time wasted hunting for files across disjointed systems. Provide a personalized single, point-access to information that surfaces relevant answers and suggests next steps—accelerating productivity and eliminating roadblocks.

One Platform, One Search

Boost productivity with a centralized, highly relevant, and personalized search experience—all within the intranet employees rely on every day.

Relevant, Accurate and Context-Aware

Deliver precise search results powered by the latest in semantic and neural search technologies enhanced with Retrieval Augmented Generation (RAG) for unparalleled accuracy.

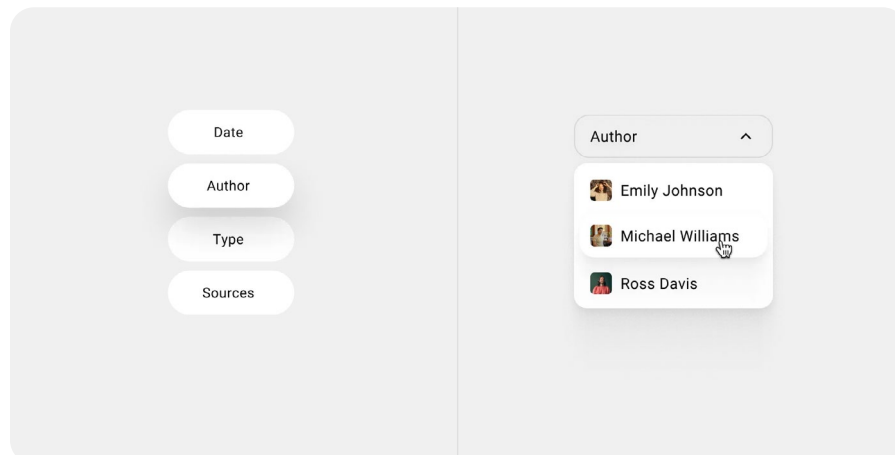

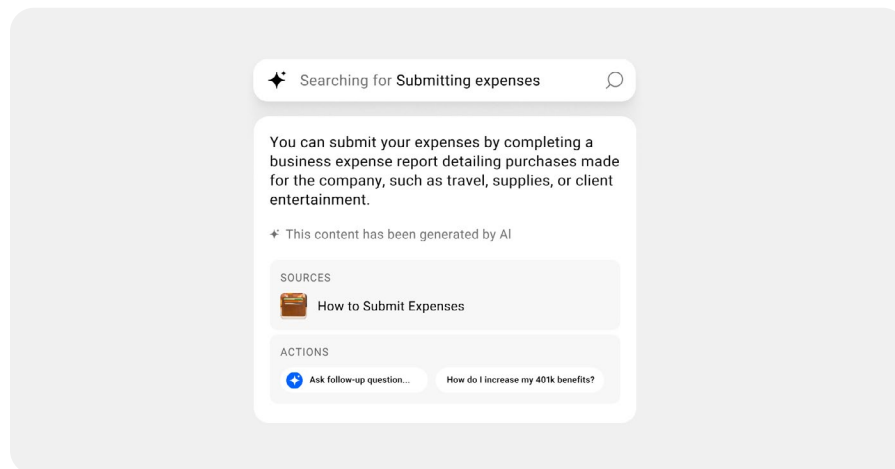

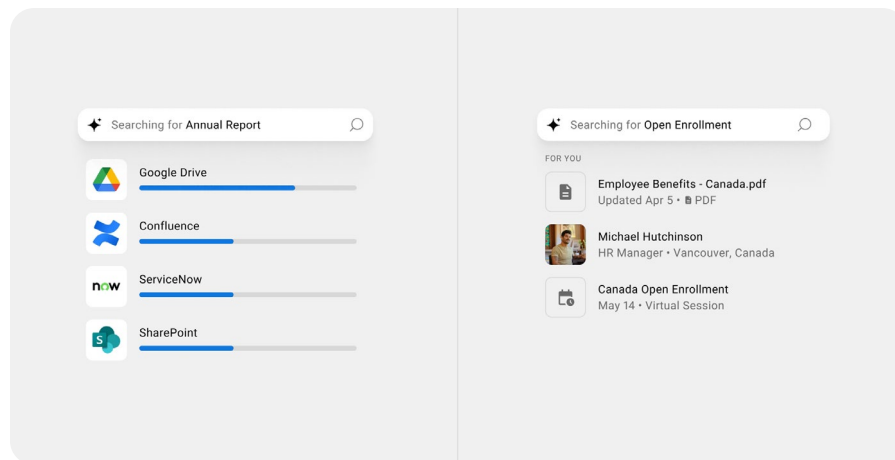

Simplified Technology Management

Streamline tech operations by combining best-in-class search and intranet in a single solution. Simplify connector management and drive operational efficiency with Enterprise Search.

Deep dive: Enterprise Search

Easy Connector Management

Seamlessly connects with Google Drive, Confluence and more, ensuring faster response times from your most-used employee data sources.

Personalized Experience

Cut through information overload with a search experience that adapts to each employee's role, location, connections, behaviors, search history and more.

Generative AI Smart Answers

Provide context-rich responses to employee queries with conversational search capabilities that instantly bring information and actionable insights to the forefront.

Recommended Actions

Proactively guide employees to the next best steps based on their previous behaviors and context—boosting efficiency and reducing IT support inquiries.

Intuitive filters

Enable more personalized and relevant search results with intuitive filters that quickly deliver employees precisely what they're looking for.

Secure, Role-Based Access

Automatically enforce permissions so employees only see the information they're authorized to access—keeping sensitive data secure.

About Simpplr

Simpplr simplifies and unifies employee communication, engagement, and enablement. It combines a single-platform approach with AI to deliver personalized, frictionless digital experiences, enabling employees to perform their best work from anywhere. As a result, employees are happier, more productive, and more successful. Learn more at simpplr.com.
